Environmental sustainability commitment

We care about our planet, and are committed to doing our part, through sustainable consumption and management of natural resources, to help address climate change and support the needs of the present and future generations.

We will

- ✓ Use the UN Sustainable Development Goals <https://sdgs.un.org/goals> as our point of reference.
- ✓ Minimise waste generation and increase recycling.
- ✓ Manage our waste responsibly.
- ✓ Strive to reduce energy consumption using efficient equipment, promoting energy-saving practices, and exploring renewable energy sources.
- ✓ Implement strategies to reduce water consumption.
- ✓ Protect the natural habitats at our premises.
- ✓ Reduce the environmental impact of transportation by encouraging public transport usage, walking, cycling, car sharing, and electric vehicle ownership.
- ✓ Hold ourselves to account through our Sustainability Working Group.

Our colleagues will

- ✓ Be ambassadors for environmental sustainability, actively participating in the plans and initiatives created by the Sustainability Working Group.
- ✓ Identify opportunities to aid our commitment to environmental sustainability.
